PRESS PARTS ROLLERS

The PRESS PARTS Roller Service

We pride ourselves on our easy and efficient roller supply. We aim to always have adequate stocks to supply a whole order in one drop.

The spindle deposit is charged on the invoice and refunded when you, the customer, return them to our works, in your own time and at your convenience.

PRESS PARTS rollers are made from the highest grades of graphic compound **anywhere** in the world - GUARANTEED!

**TIME IS SAVED ON EVERY WASHUP
WASTAGE IS REDUCED ON EVERY MAKEREADY**

PRESS PARTS PRECISION PLATE AND BLANKET HEIGHT GAUGE

At last, a blanket packing gauge which is really accurate and simple to use. It is now so easy to check vital printing pressures - without removing the blanket!

Ref	Description	Price £
PP1001	Blanket and Plate height gauge	300.00
PP1054	Replacement dial indicator (also for OPP gauge)	120.00
PP1003	Printer Pat's Puffer Gun	102.00
PP1004	Branch connector	35.00
PP1005	Puffer gun reinforced hose (per metre)	2.50

PRINTER PAT'S PRESS CLEANING GUN

The gun comes complete with the correct connections to plug into the pneumatic compressor and has 7 metres of reinforced hose which is normally sufficient for a 4 unit press. We can supply a longer hose on request. A special branch connector is supplied enabling the press to remain connected with the compressor. Extra connectors are available allowing use of the Puffer gun on several presses.

These glass bead technology jackets incorporate a special closed cell compressible underlay and fit directly on the cylinders without any further underpacking.

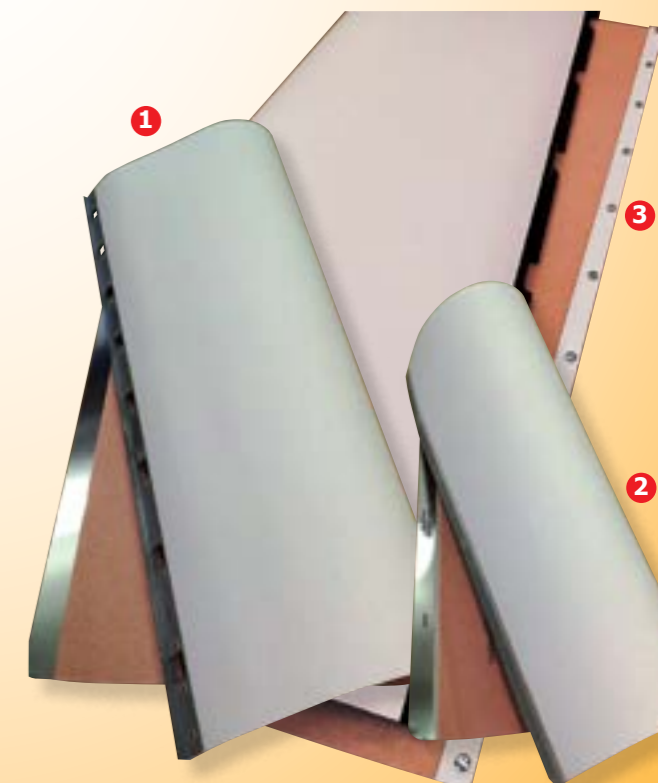

This material is also available as cut sheets (without underlay) for fitting to drums or perfecting cylinders with double sided tape.

Please note: SM102 PrintGuard now supplied without steel rod. If required rod is available as separate item PP1345.

FOLACOAT PLUS PET Coating Blanket

Genuine Folex® stripping blanket for SM74 allows you to create individual formes for the job in no time at all. This unique product can be manually or CAD cut and is able to transfer aqueous and UV coatings. Special purchase: size 605 x 740 - thickness 1.15mm

£40 each

DIE CUTTING AS FAST AS PRINTING

Perf Print Plus inline on any press

Perforating, Cutting, Die-cutting, Kiss cutting, Creasing, Scoring

Now you can produce that clever in-line finishing which impressed you at IPEX. This super kit makes it possible to produce flat die cut or perforated sheets at high speed from your own or made up cutting formes.

Finishing processes which have, up to now, only been available as slow, expensive off line operations can now be performed inhouse, as part of your printing process.

This smart new way of adding value to your printing is available to you **NOW**

The "double whammy" is that it is even possible to perform partial printing on the same unit!

Starter kits available for all presses and comprise:

- Compensated base foil with millimetre grid lines
 - Underlay base set
 - Impression cylinder protection foils
 - 10 Perforating rules
 - 5 cutting rules
 - 5 creasing rules and counters
 - 1 Felt sheet
 - 1 Rubber blanket
 - 1 Tool set (5 pieces)
- Starter kit contents may vary

See page 35 for stock list of consumables

Cutting and creasing jacket for LithoPerf available for all makes of press

Consistent quality without any embossing of the sheet can be achieved by mounting this special hard jacket on the blanket cylinder. Precision backing set is also recommended.

When Standard or Precision LithoPerf is mounted on the impression cylinder the sheets stay flat and high stacks can be run.

H.S. Boyd's
#1 UK Distributor

Side-Series Blades

Center-Series Blades

Micro-Perf Blades

• LITHO-PERF • LITHO-SCORE • LITHO-SLIT • LITHO-SNAP • MICRO-PERF

Why give profits away? Keep profits where you want them – in-house. HS Boyd Offset rules attach to the impression cylinders of the press and enable the operator to perf, score, slit and die-cut on press – while you print! Quality manufacturing steps provide you with products you can count on to perform consistently. This translates into lower costs and higher quality for your clients.

- Heat-treated for strength
- Sharpened with diamond-wheel sharpeners
- Available in the original Side Series (SS) or Center Series (CS) for increased pressure and longer runs
- Available in a variety of configurations for a multitude of applications.
